

ViND by BuQuaTi

Intelligent Predictive Analysis

Improve the **efficiency** of your production lines.

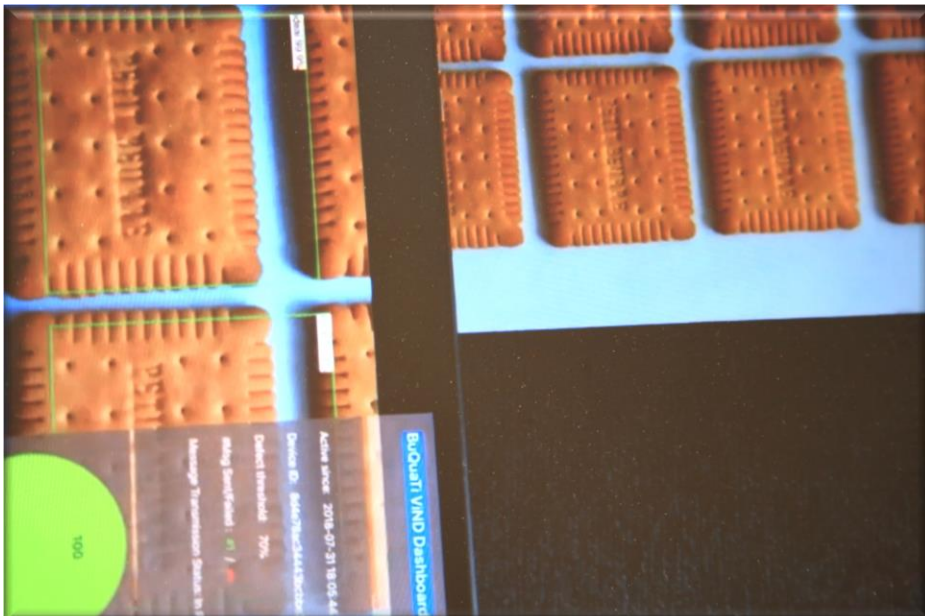

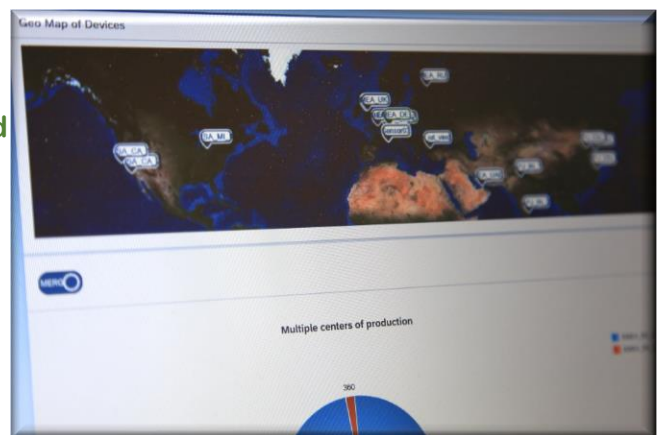

Pinpoint, and eliminate issues before they endanger your **business continuity**.

Leverage the power of the **Predictive Maintenance**, and avoid **costly production breakdowns**.

Detect, classify, count.

Harmonize Master Data, **optimize** provisioning, and **reduce** workforce training costs.

Realize the value of **IoT + Machine Learning + Big Data + Cloud**, and **Digital Twin** technologies in a unique business scenario.

BuQuaTi Visual intelligent iNDustry (BQT-ViND)

Defect detection by artificially intelligent cameras or by other IoT devices.

Real-time root-cause analysis via IoT and diversely relevant data.

Native Integration to ERP systems.

Intuitive, analytical **Dashboard**.

On-Premise or Cloud deployment on either **open-source** or **proprietary tools & technologies**.
